

Accessibility Statement

Last updated: March 15, 2026

1. Our Commitment to Accessibility

At **Aivota**, we believe that communication is a fundamental human right. We are dedicated to ensuring that our website and AAC platform are accessible to everyone, regardless of their physical or cognitive abilities. We invest significant resources into making our digital interface intuitive and compatible with the widest possible range of assistive technologies.

2. Compliance Status

Our website and web-based platform are designed to conform to the **Web Content Accessibility Guidelines (WCAG) 2.1 at Level AA**, which is the standard required by **Israeli Standard (IS) 5568** and recognized under the **U.S. Americans with Disabilities Act (ADA)**.

3. Accessibility Features on Aivota

We have implemented the following features to support diverse user needs:

- **AAC & Symbol Integration:** Our platform uses high-contrast proprietary symbols specifically designed for users with visual impairments.
- **Eye-Tracking Optimization:** The interface is calibrated for seamless use with major eye-gaze hardware and software (e.g., Tobii Dynavox, Smartbox).
- **Keyboard Navigation:** All essential functions can be performed using a keyboard or switch-access device.
- **Screen Reader Support:** We utilize ARIA (Accessible Rich Internet Applications) attributes to ensure compatibility with screen readers like NVDA and VoiceOver.
- **Alternative Text:** All meaningful images include descriptive alternative text (alt-text).

4. Known Limitations

While we strive for 100% accessibility, some areas may still be in the process of optimization:

- Third-party integrations (e.g., embedded social media feeds) may have limitations beyond our direct control.
- Legacy documents uploaded before March 2026 may not be fully tagged for screen readers.

5. Contact Us for Assistance

If you encounter any accessibility barriers or require information in an alternative format, please contact our **Accessibility Coordinator**. We are committed to addressing all issues within a reasonable timeframe.

- **Accessibility Coordinator:** Opher Suhami
- **Email:** accessibility@aivota.ai
- **Phone:** +972542271326
- **Mailing Address:** 4 Bental, Kfar Yona, Israel

6. Feedback and Reporting

We welcome your feedback on how to improve. When reporting a barrier, please include:

- The web page URL or app screen.
- A description of the problem.
- The assistive technology you were using (if any).
